Choose one of the four most desirable sports cars in 80's gaming history and blast your way through 10 races within the time limit while trying to stay in front of your opponent!

Need more speed? Press the turbo boost button for more power! Make sure you keep an eye on the temperature gauge as it will rise quickly. If the temperature goes above 103°C, the turbo boost can not be activated.

Be gentle with your fancy ride. Crashing into the scenery will damage it. After each race you get the chance to swap parts. None less than my own father -rest his soul- will tell you which part is still OK and which isn't (if you didn't know already by the stuttering engine, the smoking radiator, ...). You can even upgrade your car! Make sure you choose the right parts because everything will affect your car's performance and the wear on the other parts.

Good car control is the key to victory. A heavy foot will make the tires lose traction, going hard on the brakes while steering will send the car in a straight line. An Xbox controller is recommended as the analog controls give you more control over the car. You can also choose a lower difficulty with ABS and traction control enabled. To all drifting fans: sorry. Not in this game.

Controls (you can remap them in the options menu)

	Keyboard	Xbox controller
Throttle:	UP	Right trigger
Brake:	DOWN	Left trigger
Steering:	LEFT & RIGHT	Left joystick
Upshift:	Q	A button
Downshift:	W	X button
Turbo boost:	SPACE	Y button
<i>Manual clutch:</i>		
Next song:	B	
Pause:	P	
<i>Debug log:</i>	N	

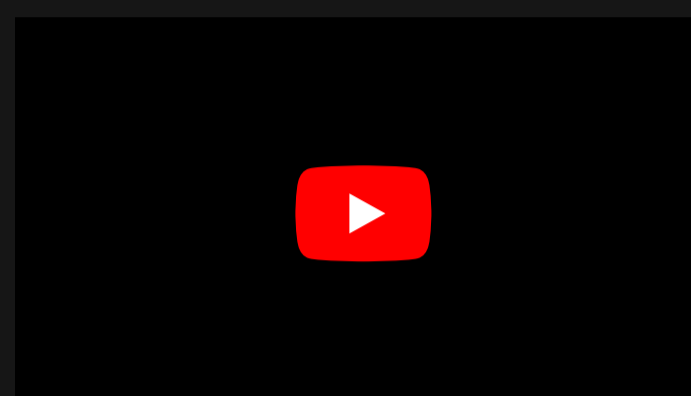

Parts screen controls

Choose category:	LEFT & RIGHT	LEFT & RIGHT
Choose part:	UP & DOWN	UP & DOWN
Schedule part replacement:	RETURN	A button
Cancel part:	BACKSPACE	Y button
Proceed with the repairs:	SPACE	START button

How to play: on the Dropbox page, click "download", after downloading, unpack the zip-file to a folder and run "Turbo Outrun Reimagined.exe".
