Install instructions

Make sure to extract all files out of the zip before running.

Mac users might have to disable some code signing or verification thing? I'm not exactly sure, I'm not a mac guy. I'll get some specifics soon.

Linux users have to make the file executable, using "chmod +x linux.x86_64". You're running linux, you can probably figure it out.

I have a small suggestion or two, but other than that this is incredible, it is true to the original, well made, and overall one of the best games on this website. The only things i would add is the ability to play as wario and waluigi, and allowing players to customize the item list, so you can have some items and not others. or add powers like penguin, bubble, and metal.

[Reply](#)

 [lloveWario](#) 5 days ago

metal nd bubble is on KKT's mod. try it.

 [SH#TM@N](#) 3 days ago

KingKittyTurnip should add the penguin suit in a future update.

Are you trying to do a fundraiser because your goal is to try and get more people in your discord before November.

Also, I don't use discord because I don't trust a lot of people on it (not referring to you.)

[Reply](#)

 [lloveWario](#) 18 days ago

wha-fundraiser? I'm not a guy trying to make user at discord, you idiot!!

do you think I'm a buissness man??

[Reply](#)

 [SuperLuigi1983](#) 9 days ago

Only a business (you spelled that wrong) man would act dissatisfied if they didn't get enough people to do a fundraiser and say things to their boss like "ok, now its almost november and we didn't even got 100 members in here."
