

Super Clash Bros (pre-alpha)

Super Clash Bros is a fan-made crossover game with an adventure mode, battle mode, and an in-game editor. The characters are generally accurate & faithful recreations, including their controls, health systems, inventories, etc. from their games. The levels in adventure mode are remakes from their games too.

I've been working on this since 2015. It's a huge project that's undergone a lot of rewriting so it's still far from done, but the battle mode is definitely fun with a group of friends.

All the characters from the old version of the game will return soon, they haven't been converted to the new codebase yet.

For now it's local multiplayer only but you can play online via Parsec.

Almost every gamepad should work. I play with my childhood SNES controller via USB adapter.

You can follow progress on the [Clash Discord server](#). If you subscribe to [my Youtube channel](#), you can click that bell after you subscribe to be notified of new videos, like upcoming character reveal trailers.

Can you make this into a ROM snes please.

Reply

TaelsDaFoom

I don't think you understand how the snes works (or how much work making an entire recreation of this game for the snes would take)
