Downloads	46681
Last Modified	24 February 2024

Description:

Tetris Rosy Retrospection DX

It's Finally Here!!!!!!

The wait is over, Creeper presents: The Tetris Rosy Retrospection Colorization Hack!!!

Includes:

- 1) Randomized colors for the Title Screen, Level Selection menu and Rocket screen!
- 2) a slightly improved "Danger-meter" adding blue at the bottom (Inspired on Tetris Axis)
- 3) Guideline Features!!!!!!

Also includes Bug fixes from the original hack and improvements:

- 1) the 7-Bag always starts full now!
- 2) Pieces now spawn in the 21st row instead of the 20th row
- 3) a better moon(?) sprite

Note: The game will NOT run on a DMG console.

WARNING: THE PATCH DOES NOT INCLUDE THE ROSY RETROSPECTION HACK!! So you must patch your rom with Ospin's hack first and then this one, otherwise it won't work

Original hack: https://www.romhacking.net/hacks/5813/

Enjoy!!

and someday, the "DX" and the "Rosy Retrospection" words will change places… wink wink

Known Bugs: The top 2 rows are never checked, so they never clear (heredated from the original hack) Color isn't applied to the top row on the Game Over animation (Probably heredated from the Original Hack) Multiplayer crashes Kicks aren't obtained properly sometimes (Heredated from the original hack)

Changelog:

v1.3

This was first gonna be 1.2, then 2.0, then 1.1.1, then 1.2 again and now 1.3

- An Extra Legal screen, you can skip it by pressing A or you can also disable it forever by pressing B
- Now you can pick whether to use the Danger-Meter or not :D

- Fixed the bug where the screen filled with garbage when pressing B on the high score screen

- Now the board background isn't white!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!, Don't like the new color?, you can change it with these game genie codes:

??0-00B-C40

??0-01B-F7F

Replace "??" with any value you like

To bring back the white, use these values:

FF0-00B-C40

7F0-01B-F7F

Once the game boots and the palettes are loaded, disable them, they're a bit unstable when clearing lines

- Made the shadow of the O piece darker

v1.1

- Oops, turns out that the pieces actually spawn in the 22nd row(according to the guideline) and not in the 21st as Creeper thought, fixed! (They now spawn in the 22nd row)
- Ghost Piece and Hold piece palettes are lighter now to avoid confusion
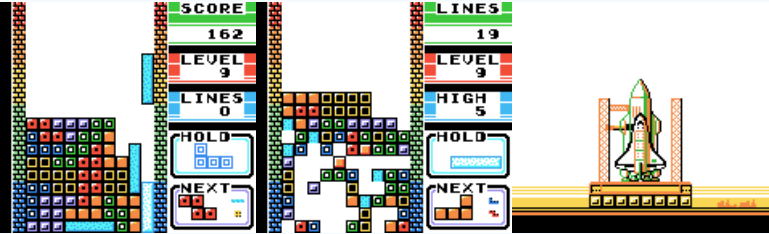

v1.0

- first release

ROM / ISO Information:

- Database match: Tetris (World) (Rev 1)
- Database: No-Intro: Game Boy/Color (v. 20210227-015730)
